PRC Environmental Tradeoffs: Modern China's Environment, Science(s) and Landscapes

Presenters and Panel Chairs: S. Harrell (UW), J. Hayes (KPU/UBC), T. Cheek (UBC), J. Friedmann (UBC), T. Kinney (KPU), P. Potter (UBC), R. Hanlon (TRU), P. Thier (UW Vanc), D. Abramson (UW), Z.G. Ye (SPU), D. Glover (UPS), J. Tippins (BERK Conslt), G. Li (UBC)

Monday, September 21, 2015 – 8:30am – 5:30pm
KPU Melville Conference Center, Richmond BC

The theme of this conference, “PRC Environmental Tradeoffs: Modern China’s Environment, Science, and Landscapes”, aims to create synergy among Pacific Northwest scholars engaged in environmental studies of China, to explore the relationship between China’s policies/politics, history, and physical environment, and to investigate issues of different effects (social-ecological) at different scales. Three panels will address issues ranging from the effect of environmental impact assessments and NGOs to CAFO policies, earthquake reconstruction to fire, floods and flood control, and the socio-ecological implications of medicinals production to developments in socio-ecological resiliency, ecosystem vulnerability & disasters.
