Language Politics and Policy in South Asia and the Himalaya

Thursday, September 19, 2019

5:30-7:00pm • CK Choi, Rm 120 • 1855 West Mall • UBC

In a retrospective of her research in Nepal, North and Northeast India, Professor Sonntag considers the relationship between language politics and policy. She analytically distinguishes the politics of governing languages and the language politics of the governed to overcome disciplinary boundaries between political science and sociolinguistic approaches to the study of language policy.
