GLOBAL ECONOMIC GOVERNANCE AT A CROSSROADS: IS THE BRETTON WOODS SYSTEM UNRAVELLING?

Coach House, Green College, UBC

Tuesday, October 1, 5-6:30 pm, with reception to follow

This year marks the 75th anniversary of one of the most famous international economic meetings of all time: the 1944 Bretton Woods conference. The conference outlined innovative principles for the postwar system of global economic governance and established the International Monetary Fund and the World Bank. This lecture examines the innovations and legacies of the Bretton Woods conference in the context of current challenges to its core principles at this time of global economic upheaval.

Those attending talks at Green College are warmly invited to come to dinner.
